Ospedale Infantile Regina Margherita in Torino is a highly specialized pediatric pole of national relevance which throughout the years has become a reference center for many children affected by serious pathologies coming also from other regions as well as foreign countries.

In the last decade, many departments have been improved, but good sanitary services are expensive and the shortage of funds risks to stop the growth of the Regina Margherita Hospital toward global excellence.

To ward off this danger, the wish of a few families from Torino to give a real, concrete contribution to the pediatric structure led to the creation of **FORMA**: Fondazione Ospedale Infantile Regina Margherita ONLUS in Torino.

**FORMA** intends to pursue excellence supporting:

- the GROWTH of the Hospital through fund raising to buy specialist equipment;
- the "CHILDIZATION" to ensure a more serene hospitalization;
- the initiatives of HUMANITARIAN MEDICINE;
- the IMAGE consolidation and the VISIBILITY increase of the name of the Regina Margherita Hospital.

Today, **FORMA** intervenes as a privileged interlocutor of Ronald McDonald House Charities toward Ospedale Infantile Regina Margherita.
